

Table of Contents

VOLUME 1: INTRODUCTION, PROJECT PLANNING AND DESCRIPTION, SCOPING AND CONSULTATION, METHODS, AND ENVIRONMENTAL SETTING

Executive Summary

Chapter 1: Introduction

1.0	INTRODUCTION.....	1-1
1.1	PROPONENT AND PROJECT OVERVIEW	1-2
1.2	PROJECT CONTEXT	1-6
1.3	PURPOSE AND ORGANIZATION OF THE EIA REPORT.....	1-11

Chapter 2: Project Planning

2.0	PROJECT PLANNING	2-1
2.1	HISTORY AND OVERVIEW OF THE PETROLEUM REFINING INDUSTRY IN NORTH AMERICA	2-1
2.1.1	North American Supply and Demand Forecast.....	2-2
2.2	IRVING OIL – A TRADITION OF QUALITY AND REFINING EXPERTISE.....	2-3
2.3	PROJECT COMMITMENTS.....	2-4
2.4	PROJECT PURPOSE	2-7
2.5	RATIONALE AND NEED FOR THE PROJECT.....	2-8
2.6	ALTERNATIVES TO THE PROJECT	2-9
2.6.1	“Null” or “Do Nothing” Alternative	2-9
2.6.2	Alternative Siting	2-9
2.6.3	Alternative Energy Supply	2-10
2.6.4	Other Alternatives to the Project	2-10
2.7	ALTERNATIVE MEANS OF CARRYING OUT THE PROJECT	2-10
2.8	PROJECT SCHEDULE	2-11
2.9	ENVIRONMENTAL MANAGEMENT.....	2-13
2.9.1	Health, Safety, and Environmental Management System.....	2-13
2.9.2	Building Design Codes	2-13
2.9.3	Standard Operating Procedures (Commissioning, Operation, and Maintenance)	2-15
2.9.3.1	Training Manual.....	2-15
2.9.4	Public Awareness and Communication.....	2-15

FINAL EIA REPORT

2.9.5 Environmental Protection Plan for Construction.....2-16

2.9.6 Emergency Response Plan for Operation.....2-17

2.9.7 Oil Pollution Emergency Plan.....2-17

 2.9.7.1 Overall Response Strategies.....2-18

 2.9.7.2 Spill Response Equipment Requirements.....2-18

 2.9.7.2.1 Spill Management Simulations.....2-19

 2.9.7.2.2 Operational Response Drills.....2-19

2.9.8 Marine Terminal Operation.....2-19

 2.9.8.1 TERMPOL Review Process.....2-19

 2.9.8.2 Marine Terminal Manual.....2-20

2.9.9 Greenhouse Gas (GHG) Management Plan.....2-20

2.9.10 Groundwater Monitoring Program.....2-21

2.9.11 Vegetation Management Plan.....2-22

2.9.12 Decommissioning and Abandonment Plan.....2-22

2.9.13 Follow-Up and Monitoring Initiatives.....2-22

Chapter 3: Project Description

3.0 PROJECT DESCRIPTION.....3-1

3.1 GENERAL OVERVIEW.....3-1

3.2 PETROLEUM REFINERY AND OTHER LAND-BASED INFRASTRUCTURE.....3-2

 3.2.1 Petroleum Refinery and Associated Infrastructure.....3-2

 3.2.1.1 Overview of the Petroleum Refining Process.....3-5

 3.2.1.2 Location and Layout.....3-7

 3.2.1.3 Crude Oil and Finished Product Storage, Conveyance, and Transfer Systems.....3-7

 3.2.1.3.1 Storage Tanks.....3-7

 3.2.1.3.1.1 Crude Oil Storage Tanks.....3-8

 3.2.1.3.1.2 Intermediate Storage Tanks and Finished Product Storage Tanks.....3-11

 3.2.1.3.2 Refinery Piping and Pipelines.....3-12

 3.2.1.3.3 Loading Systems.....3-13

 3.2.1.3.3.1 Rail Car Loading Systems.....3-13

 3.2.1.3.3.2 Ship Loading Systems.....3-16

 3.2.1.3.4 Vapour Recovery Systems.....3-16

 3.2.1.3.5 Coke Handling System.....3-17

 3.2.1.4 Refinery Complex.....3-20

 3.2.1.4.1 General Description of the Proposed Refinery Process.....3-21

 3.2.1.4.2 Crude Distillation Unit.....3-22

 3.2.1.4.3 Heavy Oil Upgrader.....3-28

 3.2.1.4.4 Gas Oil Hydrocracker Unit.....3-28

 3.2.1.4.5 Continuous Catalytic Reforming Unit.....3-29

 3.2.1.4.6 Aromatics Saturation Unit.....3-29

 3.2.1.4.7 Light and Medium Hydrotreater Units.....3-30

 3.2.1.4.8 LPG Treater Unit.....3-30

 3.2.1.5 Selective Hydrogenation Unit (SHU)/Alkylation Unit (Alky).....3-31

3.2.1.5.1	Sulphur Recovery and Treatment.....	3-31
3.2.1.5.1.1	Amine Regeneration Units	3-31
3.2.1.5.1.2	Sour Water Strippers.....	3-32
3.2.1.5.1.3	Sulphur Recovery Units	3-33
3.2.1.5.1.4	Tail Gas Treatment Units	3-33
3.2.1.6	Ancillary Processes, Equipment, and Systems	3-34
3.2.1.6.1	Hydrogen Plant.....	3-34
3.2.1.6.2	Flare System	3-35
3.2.1.6.3	Refinery Piping	3-36
3.2.1.6.4	Steam and Power Generation	3-36
3.2.1.6.4.1	Cogeneration Plant	3-36
3.2.1.6.4.2	Steam Generation	3-38
3.2.1.6.4.3	Other Electrical Power Supply Options.....	3-38
3.2.1.6.5	Continuous Emissions and Ambient Air Quality Monitoring.....	3-39
3.2.1.6.6	Vapour Recovery	3-39
3.2.1.6.7	Other Buildings and Infrastructure	3-39
3.2.1.6.8	Water Supply	3-40
3.2.1.6.8.1	Potable Water	3-40
3.2.1.6.8.2	Cooling Water	3-40
3.2.1.6.8.3	Process Water.....	3-42
3.2.1.6.9	Wastewater Treatment	3-43
3.2.1.6.9.1	High Total Dissolved Solids Treatment System	3-45
3.2.1.6.9.2	Low Total Dissolved Solids Treatment System.....	3-46
3.2.1.6.9.3	Waste Activated Sludge Handling System.....	3-47
3.2.1.6.9.4	Enclosed Hydrocarbon Vapour Combustor.....	3-47
3.2.1.6.10	Automated Safety Instrumented Systems	3-49
3.2.1.6.10.1	Process Control System.....	3-49
3.2.1.6.10.2	Fire Prevention Systems	3-49
3.2.1.6.10.3	Security and Fencing	3-50
3.2.1.6.11	Emergency Power Generation	3-50
3.2.2	Linear Facilities	3-50
3.2.2.1	Overview of Linear Facilities.....	3-51
3.2.2.1.1	Route Selection Process	3-52
3.2.2.2	Description of Linear Facilities.....	3-53
3.2.2.2.1	Transfer Systems	3-53
3.2.2.2.2	Crude/Finished Product Transfer Lines	3-54
3.2.2.2.3	Intermediate and Finished Product Pipelines	3-54
3.2.2.2.4	Natural Gas Pipeline.....	3-54
3.2.2.2.5	Municipal Water Mains	3-54
3.2.2.2.6	Circulating Water Pipeline	3-57
3.2.2.3	Electrical Transmission Line and Associated Infrastructure	3-57
3.2.2.4	Rail Line.....	3-58
3.2.2.5	Road Transportation	3-58
3.2.2.5.1	Refinery Access.....	3-59
3.2.2.5.2	Marine Terminal and Storage Tank Area Access	3-59
3.2.2.5.3	On-Site Roads	3-59
3.2.2.5.4	Linear Facilities Access	3-59

3.2.2.5.5	Heavy Haul Road	3-59
3.2.2.6	Location and Layout	3-59
3.2.3	Alternative Means of Carrying Out the Project	3-60
3.2.3.1	Alternative Products	3-60
3.2.3.2	Alternative Refining Processes and Infrastructure.....	3-60
3.2.3.2.1	Alternative Steam and Power Supply	3-61
3.2.3.2.2	Alternative Emissions Control Equipment	3-62
3.2.3.2.2.1	Sulphur Recovery and Tail Gas Treatment.....	3-63
3.2.3.2.2.2	Control of Nitrogen Oxides.....	3-64
3.2.3.2.2.3	Minimization of Greenhouse Gas Emissions	3-65
3.2.3.2.2.4	Vapour Recovery	3-66
3.2.3.2.3	Alternative Process Water Supply	3-67
3.2.3.2.4	Alternative Cooling Water Supply.....	3-68
3.2.3.3	Alternative Wastewater Treatment Facilities	3-68
3.2.3.4	Alternative Linear Corridors.....	3-71
3.2.4	Construction	3-71
3.2.4.1	Site and Right-of-Way Preparation.....	3-71
3.2.4.1.1	Surveying and Clearing	3-72
3.2.4.1.2	Blasting.....	3-72
3.2.4.1.3	Grubbing and Duff/Top Soil Stripping.....	3-73
3.2.4.1.4	Grading and Levelling.....	3-73
3.2.4.1.5	Construction of Temporary Facilities	3-73
3.2.4.2	Physical Construction and Equipment Installation.....	3-74
3.2.4.2.1	Pile Driving	3-74
3.2.4.2.2	Pouring of Footings and Foundations.....	3-74
3.2.4.2.3	Erection of Buildings and Structures	3-74
3.2.4.2.4	Large Module and Very Large Module Construction and Transportation	3-75
3.2.4.2.5	Installation of Process Equipment and Systems.....	3-76
3.2.4.3	Construction of Linear Facilities and Watercourse Crossings (Including Wetlands)	3-76
3.2.4.3.1	Pipelines and Refinery Piping Construction	3-76
3.2.4.3.2	New Rail Line Construction	3-77
3.2.4.3.3	Electrical Transmission Line Construction.....	3-78
3.2.4.3.4	Construction of Site Access Roads, Heavy Haul Road, and On Site Roads	3-78
3.2.4.3.5	Construction of Watercourse Crossings (Including Wetland Crossings)	3-79
3.2.4.4	Commissioning	3-80
3.2.4.5	Road Transportation.....	3-81
3.2.4.6	Employment and Expenditure	3-83
3.2.4.6.1	Worker Accommodations	3-84
3.2.4.6.2	Expenditure	3-85
3.2.5	Operation.....	3-86
3.2.5.1	Operation and Maintenance of Refinery Processes and Equipment.....	3-86
3.2.5.1.1	Refinery Operation and Maintenance.....	3-87
3.2.5.1.2	Transfer and Storage of Feedstocks and Products	3-88
3.2.5.1.3	Operation of Steam Generation and Power Supply Systems.....	3-88

- 3.2.5.1.4 Operation of Water Supply Systems 3-89
- 3.2.5.2 Emissions Control and Management of Effluents and Wastes..... 3-89
 - 3.2.5.2.1 Operation of Environmental Control Systems..... 3-89
 - 3.2.5.2.2 Operation of Wastewater Treatment Units and Systems..... 3-89
 - 3.2.5.2.3 Air Quality and Effluent Release Monitoring 3-89
- 3.2.5.3 Water Supply and Use..... 3-90
 - 3.2.5.3.1 Freshwater Use 3-90
 - 3.2.5.3.2 Cooling Water System 3-90
- 3.2.5.4 Linear Facilities Presence and Operation..... 3-90
 - 3.2.5.4.1 Electrical Transmission Line Operation 3-91
 - 3.2.5.4.2 Pipeline Presence and Operation 3-91
 - 3.2.5.4.3 Rail Line Operation 3-91
- 3.2.5.5 Right-of-Way Infrastructure and Maintenance 3-91
 - 3.2.5.5.1 Pipeline and Valve Site Maintenance 3-91
 - 3.2.5.5.2 Roadway Maintenance 3-91
 - 3.2.5.5.3 Vegetation Control 3-92
- 3.2.5.6 Road and Rail Transportation..... 3-92
- 3.2.5.7 Employment and Expenditure 3-94
 - 3.2.5.7.1 Employment..... 3-94
 - 3.2.5.7.2 Expenditures..... 3-95
- 3.2.6 Decommissioning and Abandonment..... 3-95
 - 3.2.6.1 Removal of Facilities and Site Reclamation 3-96
- 3.3 MARINE TERMINAL AND OTHER MARINE-BASED INFRASTRUCTURE..... 3-97**
 - 3.3.1 Overview 3-97
 - 3.3.2 Location and Layout 3-97
 - 3.3.3 Description of the Marine Terminal Facilities 3-98
 - 3.3.3.1 Use of Existing Single Buoy Mooring 3-101
 - 3.3.3.2 Jetty 3-101
 - 3.3.3.2.1 Jetty and Trestle Structure 3-102
 - 3.3.3.3 Marine Oil Handling and Transfer Facilities..... 3-105
 - 3.3.3.3.1 Loading Arms 3-106
 - 3.3.3.3.2 Pipelines 3-106
 - 3.3.3.3.3 Conveyors 3-106
 - 3.3.3.4 Barge Landing Facility 3-106
 - 3.3.3.5 Seawater Cooling Intake Structure..... 3-108
 - 3.3.3.6 Wastewater Release Outfall (Potentially Including Cooling Seawater) 3-109
 - 3.3.4 Alternative Means of Carrying Out the Project..... 3-110
 - 3.3.4.1 Alternative Shipping..... 3-110
 - 3.3.4.2 Alternatives to Marine Terminal..... 3-111
 - 3.3.4.2.1 Use Existing Infrastructure 3-111
 - 3.3.4.2.2 Construct Second Single Buoy Mooring 3-111
 - 3.3.4.2.3 Alternative Marine Terminal Configurations..... 3-111
 - 3.3.4.3 Alternative Locations and Configurations to Seawater Cooling Intake Structure 3-112
 - 3.3.4.4 Alternative Locations and Configurations for Wastewater Outfall..... 3-112
 - 3.3.5 Construction 3-113

- 3.3.5.1 Construction and Installation of Jetty and Other Marine-Based Infrastructure 3-113
 - 3.3.5.1.1 Site Preparation and Installation..... 3-114
 - 3.3.5.1.2 Dredging and Disposal 3-114
- 3.3.5.2 Marine Vessel Transportation..... 3-115
 - 3.3.5.2.1 Marine Vessel Transportation and Unloading 3-115
 - 3.3.5.2.2 Anchorage of Marine Vessels..... 3-115
 - 3.3.5.2.3 Berthing and Deberthing of Vessels at Barge Landing Facility 3-115
- 3.3.5.3 Employment and Expenditure 3-115
- 3.3.6 Operation..... 3-116
 - 3.3.6.1 Marine Vessel Transportation, Berthing and Deberthing..... 3-116
 - 3.3.6.1.1 Shipping Activities 3-116
 - 3.3.6.1.2 Marine Vessel Transportation and Crude Oil Transfer 3-116
 - 3.3.6.1.3 Anchorage of Marine Vessels..... 3-117
 - 3.3.6.1.4 Berthing and Deberthing of Vessels at the Existing SBM and Transfer Berths 3-117
 - 3.3.6.2 Crude Oil and Finished Product Transfer 3-117
 - 3.3.6.2.1 Crude Oil Transfer at the Existing SBM and the Jetty 3-117
 - 3.3.6.2.2 Finished Product Transfer at Berths..... 3-118
 - 3.3.6.3 Wastewater, Seawater, and Storm Water Release 3-118
- 3.3.7 Decommissioning and Abandonment..... 3-118
 - 3.3.7.1 Removal of Facilities and Site Reclamation 3-118
- 3.4 EMISSIONS AND WASTES 3-119**
 - 3.4.1 Air Contaminant, GHG, Sound and Light Emissions..... 3-119
 - 3.4.1.1 Air Contaminant and GHG Emissions 3-120
 - 3.4.1.1.1 Emissions Inventory Methodology and COPC/GHG List Development 3-120
 - 3.4.1.1.2 Construction—Emissions from the Petroleum Refinery and Other Land-Based Infrastructure 3-122
 - 3.4.1.1.2.1 Emissions from Road Vehicle Traffic to the Site 3-122
 - 3.4.1.1.2.2 Emissions from Non-Road Equipment 3-124
 - 3.4.1.1.2.3 Emissions from Site Preparation Activities..... 3-125
 - 3.4.1.1.2.4 Particulate Matter from Concrete Batch Plants 3-126
 - 3.4.1.1.3 Construction—Emissions from the Marine Terminal and Other Marine-Based Infrastructure 3-126
 - 3.4.1.1.4 Operation—Emissions from of the Refinery Complex and Other Land-Based Infrastructure 3-127
 - 3.4.1.1.4.1 Emissions from Petroleum Refinery Point Sources 3-127
 - 3.4.1.1.4.2 Emissions from Coke Handling and Storage 3-134
 - 3.4.1.1.4.3 Emissions from Storage Tanks 3-135
 - 3.4.1.1.4.4 Emissions from Valves, Fittings and Wastewater Treatment..... 3-137
 - 3.4.1.1.4.5 Emissions from Rail Loading..... 3-140
 - 3.4.1.1.5 Emissions from Project-Related Vehicle Traffic..... 3-140
 - 3.4.1.1.6 Operation—Emissions from the Marine Terminal and Other Marine-Based Infrastructure 3-141
 - 3.4.1.1.6.1 Marine Vessel Traffic Emissions 3-141

3.4.1.1.6.2	Marine Vessel Loading Emissions	3-144
3.4.1.1.7	Overall Summary – Total Emissions During Operation	3-145
3.4.1.2	Sound Emissions	3-146
3.4.1.2.1	Construction	3-146
3.4.1.2.2	Operation	3-147
3.4.1.3	Light Emissions	3-148
3.4.2	Wastewater	3-149
3.4.2.1	Process Wastewater	3-149
3.4.2.2	Site Run-off	3-150
3.4.2.3	Cooling Water	3-151
3.4.3	Water Use	3-151
3.4.3.1	Construction	3-151
3.4.3.1.1	Water for Concrete Mixing	3-151
3.4.3.1.2	Hydrotest Water	3-152
3.4.3.2	Operation	3-152
3.4.4	Solid Waste	3-152
3.4.4.1	Construction	3-152
3.4.4.1.1	Sanitary Waste	3-153
3.4.4.2	Operation	3-153
3.4.4.2.1	Sanitary Waste	3-153
3.4.4.2.2	Office Waste	3-153
3.4.4.2.3	Maintenance Waste	3-153
3.4.4.2.4	Hazardous Waste	3-154
3.5	SUMMARY OF KEY TECHNICAL STUDIES	3-154
3.5.1	Atmospheric Environment	3-154
3.5.1.1	Air Quality Technical Study – Summary	3-155
3.5.1.1.1	Study Methodology	3-155
3.5.1.1.1.1	Chemicals of Potential Concern	3-156
3.5.1.1.1.2	Modelling Domains	3-156
3.5.1.1.2	Ambient Air Quality Monitoring	3-157
3.5.1.1.2.1	Emissions Inventory	3-162
3.5.1.1.3	Dispersion and Deposition Modelling Methodology	3-162
3.5.1.1.3.1	Model Description	3-163
3.5.1.1.3.2	Model Selection	3-164
3.5.1.1.3.3	Dispersion Modelling Approach	3-165
3.5.1.1.3.4	Criteria Air Contaminants (CAC)	3-166
3.5.1.1.3.5	Non-Criteria Air Contaminants (Non-CAC)	3-166
3.5.1.1.3.6	Secondary Particulate Formation	3-167
3.5.1.1.3.7	Potential Acid Input	3-167
3.5.1.1.3.8	Long-Range Transport	3-167
3.5.1.1.3.9	Odour	3-168
3.5.1.1.3.10	Plume Visibility	3-169
3.5.1.1.3.11	Ozone	3-170
3.5.1.1.3.12	Ambient Concentrations and Background	3-170
3.5.1.1.4	Dispersion and Deposition Modelling Results	3-175
3.5.1.1.5	Air Quality Technical Study – Summary of Main Observations	3-210

3.5.1.1.6	Greenhouse Gas Emissions and Climate Considerations.....	3-216
3.5.1.1.7	Climate Change Policy and Regulations	3-216
3.5.1.1.8	Projected GHG Emissions from the Project	3-217
3.5.1.1.9	GHG Emissions from the Project in Comparison to Local, Provincial, National and Global Totals.....	3-217
3.5.1.1.10	Weather and Climate Effects on the Project.....	3-219
3.5.1.2	Sound Quality Technical Study – Summary	3-219
3.5.1.2.1	Existing Sound Quality	3-220
3.5.1.2.2	Project-Related Noise Emissions	3-225
3.5.1.2.2.1	Construction.....	3-226
3.5.1.2.2.2	Operation	3-238
3.5.1.2.3	Sound Quality Technical Study – Summary of Main Observations ...	3-239
3.5.1.3	Lighting Technical Study – Summary	3-244
3.5.1.3.1	Baseline Light Measurements – Existing Saint John Refinery and Refinery PDA.....	3-250
3.5.1.3.2	Prediction of Project-Related Light Quality	3-252
3.5.2	Human Health and Ecological Risk Assessment (HHERA) Technical Study – Summary.....	3-258
3.5.2.1	Fundamentals of Risk Assessment	3-263
3.5.2.2	Project Alone Case HHERA	3-263
3.5.2.3	Potential Releases from the Project to the Atmosphere.....	3-263
3.5.2.4	The Assessment Area, Receptor Locations and Human and Ecological Receptors	3-267
3.5.2.4.1	Human Receptors.....	3-271
3.5.2.4.2	Ecological Receptors.....	3-276
3.5.2.5	Exposure Assessment.....	3-280
3.5.2.5.1	Exposure Point Concentrations	3-280
3.5.2.5.2	Human Receptor Exposure to COPC	3-281
3.5.2.5.3	Ecological Receptor Exposure to COPC	3-284
3.5.2.6	Assessment of Chemical Hazard	3-284
3.5.2.7	Risk.....	3-287
3.5.2.7.1	Non-Cancer Causing Chemicals	3-288
3.5.2.7.2	Cancer-Causing Chemicals.....	3-289
3.5.2.8	Results of the Human Health and Ecological Risk Assessment.....	3-289
3.5.2.8.1	Human Health Risk Characterization	3-289
3.5.2.8.1.1	Criteria Air Contaminants – Inhalation Risk Assessment.....	3-289
3.5.2.8.1.2	Non-Criteria Air Contaminants – Inhalation Risk Assessment.....	3-290
3.5.2.8.1.3	Multiple Pathway Assessment at HHRA Receptor Locations.....	3-293
3.5.2.8.2	Ecological Risk Assessment.....	3-294
3.5.2.8.3	Human Health and Ecological Risk Assessment – Summary of Main Observations.....	3-305
3.5.3	Effluent Release Modelling Technical Study – Summary.....	3-305
3.5.3.1	Sources of Information	3-306
3.5.3.2	Site-Specific Characteristics.....	3-307
3.5.3.2.1	Hydrodynamic Parameters	3-307
3.5.3.2.2	Marine Water Quality Parameters	3-308

3.5.3.3	Results.....	3-308
3.5.3.3.1	Effluent Outfall – Seawater Cooling Option	3-308
3.5.3.3.2	Effluent Outfall – Cooling Tower Option	3-309
3.5.3.3.3	Effluent Release Modelling.....	3-309
3.5.3.4	Effects of Extreme Environmental Conditions	3-312
3.5.3.5	Effluent Release Modelling Technical Study – Summary of Main Observations	3-325
3.5.4	Marine Ecological Risk Assessment Technical Study – Summary	3-326
3.5.4.1	Purpose	3-326
3.5.4.2	Framework and Setting	3-329
3.5.4.2.1	Risk Assessment Framework	3-329
3.5.4.3	Problem Formulation	3-330
3.5.4.3.1	Spatial and Temporal Extent of the Study	3-331
3.5.4.3.2	Emission Sources Included in the Model.....	3-332
3.5.4.3.3	Screening of Ecological Receptors.....	3-344
3.5.4.3.3.1	Near Shore and Offshore Sediment Communities.....	3-346
3.5.4.3.3.2	Near Shore and Offshore Aquatic Communities	3-347
3.5.4.3.4	Conceptual Exposure Model	3-347
3.5.4.4	Exposure Assessment.....	3-347
3.5.4.4.1	COPC Fate and Transport Modelling	3-349
3.5.4.4.2	Estimating Receptor Exposure to COPC.....	3-351
3.5.4.5	Toxicity Assessment.....	3-356
3.5.4.6	Risk Characterization	3-356
3.5.4.7	Conservatism in the MERA	3-360
3.5.4.8	Marine Ecological Risk Assessment Technical Study – Summary of Main Observations.....	3-361
3.5.5	Visual Environment Technical Study – Summary	3-362
3.5.5.1	Methods.....	3-363
3.5.5.2	Data Sources and Limitations.....	3-363
3.5.5.3	Technology Application	3-363
3.5.5.4	Viewshed Analysis.....	3-364
3.5.5.5	Preparation of 3-D Photo Montages	3-365
3.5.5.5.1	Results.....	3-365
3.5.5.5.2	Saint John Airport Approach Flight Path Separation	3-377
3.5.6	Linear Facilities Corridor Selection Technical Study – Summary.....	3-377
3.5.6.1	Data	3-378
3.5.6.2	Identification of Potential Corridors.....	3-381
3.5.6.3	Public and Stakeholder Consultation and Input.....	3-382
3.5.6.4	Corridor Selection Methods and Criteria	3-385
3.5.6.5	Corridor Selection Results.....	3-386

Chapter 4: Regulatory Framework, Scoping and Consultation and Engagement

4.0	REGULATORY FRAMEWORK, SCOPING, AND CONSULTATION AND ENGAGEMENT	4-1
4.1	REGULATORY FRAMEWORK.....	4-1

FINAL EIA REPORT

4.1.1	New Brunswick Environmental Impact Assessment Regulation	4-1
4.1.1.1	EIA Process for Project Eider Rock.....	4-2
4.1.1.2	Technical Review Committee (TRC)	4-3
4.1.2	Canadian Environmental Assessment Act	4-4
4.1.2.1	EA Process for Project Eider Rock.....	4-5
4.1.3	Other Approvals, Permits, and Authorizations	4-6
4.2	SCOPE OF THE EIA/EA	4-9
4.2.1	New Brunswick Environmental Impact Assessment Regulation	4-10
4.2.1.1	Scope of Project	4-10
4.2.1.2	Factors to be Considered	4-11
4.2.2	Canadian Environmental Assessment Act	4-12
4.2.2.1	Scope of Project	4-12
4.2.2.2	Factors to be Considered	4-13
4.3	CONSULTATION AND ENGAGEMENT	4-14
4.3.1	Regulatory Consultation	4-15
4.3.2	First Nations Engagement.....	4-19
4.3.2.1	Engagement Activities Conducted.....	4-19
4.3.2.2	Summary of Key Issues Raised by First Nations and Aboriginal Persons ...	4-20
4.3.2.3	Current Use of Land and Resources, and Traditional Ecological Knowledge.....	4-21
4.3.3	Public and Stakeholder Engagement.....	4-21
4.3.3.1	Public Engagement Tools.....	4-21
4.3.3.1.1	Open Houses.....	4-22
4.3.3.1.1.1	Open House #1 – February 2007.....	4-22
4.3.3.1.1.2	Open House #2 – December 2007	4-22
4.3.3.1.1.3	Open House #3 – November 2008	4-23
4.3.3.1.1.4	Key Issues Raised at Open Houses	4-23
4.3.3.1.2	Workshops.....	4-25
4.3.3.1.2.1	Air Quality and Human Health and Ecological Risk Assessment Workshop – May 2007.....	4-25
4.3.3.1.2.2	Terms of Reference Workshop – January 2008	4-25
4.3.3.1.2.2.1	Follow-up Activities from January 2008 Terms of Reference Workshop.....	4-26
4.3.3.1.2.3	Key Issues Raised from Workshops	4-26
4.3.3.1.3	Key Stakeholder Engagement.....	4-26
4.3.3.1.4	Red Head Resident Engagement.....	4-28
4.3.4	Overall Summary of Issues and Concerns.....	4-29
4.4	SELECTION OF VALUED ENVIRONMENTAL COMPONENTS.....	4-30

Chapter 5: Environmental Assessment Methods

5.0	ENVIRONMENTAL ASSESSMENT METHODS.....	5-1
5.1	OVERVIEW OF APPROACH	5-2
5.2	SCOPING OF THE ASSESSMENT.....	5-2

FINAL EIA REPORT

- 5.2.1 Rationale for Selection of Valued Environmental Component, Regulatory Setting, and Consultation5-2
- 5.2.2 Identification of Environmental Effects5-2
- 5.2.3 Selection of Measurable Parameters5-2
- 5.2.4 Temporal Boundaries5-2
- 5.2.5 Spatial Boundaries5-2
- 5.2.6 Administrative and Technical Boundaries5-2
- 5.2.7 Thresholds for Determining the Significance of Residual Environmental Effects.....5-2

- 5.3 EXISTING CONDITIONS.....5-2**

- 5.4 PROJECT INTERACTIONS WITH THE ENVIRONMENT5-2**

- 5.5 ENVIRONMENTAL EFFECTS ASSESSMENT.....5-2**
 - 5.5.1 Assessment of Project-Related Environmental Effects5-2
 - 5.5.1.1 Description of Project-Related Environmental Effects5-2
 - 5.5.1.2 Mitigation of Project Environmental Effects5-2
 - 5.5.1.3 Characterization of Residual Project Environmental Effects5-2
 - 5.5.2 Assessment of Cumulative Environmental Effects5-2
 - 5.5.2.1 Screening for Cumulative Environmental Effects5-2
 - 5.5.2.2 Identification of Other Projects and Activities5-2
 - 5.5.2.3 Description of Cumulative Environmental Effects5-2
 - 5.5.2.4 Use of Temporal Cases5-2
 - 5.5.2.5 Mitigation of Residual Cumulative Environmental Effects5-2
 - 5.5.3 Characterization of Residual Cumulative Environmental Effects5-2

- 5.6 DETERMINATION OF THE SIGNIFICANCE OF RESIDUAL ENVIRONMENTAL EFFECTS.....5-2**
 - 5.6.1 Determination of Significance of Project-Related Residual Environmental Effects5-2
 - 5.6.2 Determination of Significance of Residual Cumulative Environmental Effects.....5-2

- 5.7 FOLLOW-UP AND MONITORING5-2**

- 5.8 POTENTIAL ACCIDENTS, MALFUNCTIONS AND UNPLANNED EVENTS5-2**

Chapter 6: Existing Conditions

- 6.0 ENVIRONMENTAL SETTING6-1**
 - 6.1 HISTORICAL SETTING.....6-1**
 - 6.1.1 Saint John Overview6-1
 - 6.1.2 Mispic and Vicinity Overview.....6-5
 - 6.2 BIOPHYSICAL SETTING.....6-7**
 - 6.2.1 Physiography and Geology6-8
 - 6.2.1.1 Topography and Drainage.....6-8
 - 6.2.1.2 Surficial Geology6-8
 - 6.2.1.3 Bedrock Geology6-14
 - 6.2.1.4 Localized Seismic Activity6-16
 - 6.2.2 Water Resources.....6-16
 - 6.2.2.1 Potable Water.....6-19

FINAL EIA REPORT

6.2.2.2	Watersheds	6-19
6.2.2.3	Hydrogeology	6-20
6.2.3	Atmospheric Environment	6-20
6.2.3.1	Climate	6-20
6.2.3.1.1	Climate Normals	6-27
6.2.3.2	Air Quality	6-28
6.2.4	Freshwater Aquatic Environment	6-29
6.2.4.1	Local Watersheds	6-30
6.2.4.2	Water Quality	6-30
6.2.4.3	Fish and Fish Habitat	6-30
6.2.4.4	Freshwater Fish Resource Use	6-33
6.2.5	Terrestrial and Wetland Environment	6-33
6.2.5.1	Vegetation and Rare Plants	6-37
6.2.5.2	Wetlands	6-37
6.2.5.3	Wildlife and Wildlife Habitat	6-38
6.2.5.4	Birds	6-41
6.2.6	Marine Environment	6-41
6.2.6.1	Currents and Waves	6-41
6.2.6.2	Bathymetry and Marine Geomorphology	6-42
6.2.6.3	Water and Sediment Quality	6-42
6.2.6.4	Marine Biological Environment	6-45
6.3	SOCIO-ECONOMIC SETTING	6-45
6.3.1	Demographic Overview	6-46
6.3.1.1	Population	6-46
6.3.1.2	Education	6-46
6.3.1.3	Employment and Income	6-47
6.3.2	Economic Activity and Economic Engines	6-47
6.3.2.1	Labour Force	6-47
6.3.3	Land Use	6-48
6.3.3.1	Land Use Planning	6-48
6.3.3.2	Zoning and Land Use	6-49
6.3.4	Community Services and Infrastructure	6-49
6.3.5	Commercial Fisheries Resources	6-50
6.3.6	Transportation and Transportation Infrastructure	6-53
6.3.6.1	Road	6-53
6.3.6.2	Rail	6-53
6.3.6.3	Marine	6-54
6.3.6.4	Air	6-54
6.3.7	Heritage and Archaeological Resources	6-54
6.4	OTHER FUTURE PROJECTS AND ACTIVITIES	6-55

List of Tables

Table 2.1	Selected Codes and Standards That May be Applicable to the Project.....	2-14
